

Thursday 23 November 2023

Welcome to your edition of *In the Loop* for Thursday 23 November 2023.

In this issue:

- A message from our CEO - Jeff Malone
- BioMelbourne Network announcement
- Wilam - Life Sciences Industry Community
- BioResource Hub
- BioMelbourne Network events
- Sector events
- Sector news
- Job opportunities
- Programs, grants and funding

A message from our CEO - Jeff Malone

Today, we are holding the 2023 BioMelbourne Network Annual General Meeting. It's an exciting time for the Network, for Victoria and Australia as the sector grows in strength and global recognition. It's also wonderful to meet our members, review the year we've had and plan our future direction.

Recently, BioMelbourne Network attended the AusBiotech 2023 Conference in Brisbane. The three-day event was well attended and there was energy in the room. During the conference, we held a group meeting with the other state-based bodies, state-based MTPConnect representatives and AusBiotech to discuss greater collaboration and coordination throughout the country.

On 2 November, Moderna announced the launch of the [mRNA Platform Incubator Network](#) (mPIN). Moderna's Regional Research Centre in Melbourne will serve as a hub for the Platform Incubator Network, enabling regular cross-functional collaboration, exploration and execution of translational research projects. It will also contribute new insights to the broader scientific and regulatory community through publications and discussions, and support development of the next generation of researchers.

Moderna is leveraging its partnership with BioMelbourne Network by establishing and administering their own dedicated invitation only, sub-community for mPIN on Wilam to facilitate discussion, knowledge sharing and community building within the mPIN community.

BioMelbourne Network is dedicated to empowering our members and the broader industry to deliver on your strategic initiatives. If you want to learn more about how we can partner with you, feel free to contact me at jmalone@biomelbourne.org.

Jeff Malone
Chief Executive Officer
BioMelbourne Network

BioMelbourne Network announcement

Over the past year, we have been collaborating with Life Sciences Queensland (LSQ) and BioNSW on trade missions and advocacy activities. The recent visit by the Minnesota trade mission was a good example of how presenting our ecosystems to the Minnesota trade mission delegation and coordinating their visit helps build a long-term bridge between Australia and Minnesota.

Find the list of participants and their interests on Wilam, and connect with them!

Wilam of the week
Life Sciences Industry Community

Do you use 3D printing to design and manufacture pharmaceutical drug products?

Bryce Barber, a PhD student from Monash University, would love to hear from you.

He is exploring demand here and overseas for these skills.
